Steps for Installation of Inmarsat LaunchPad :

Note: The user needs to be an administrator to install Inmarsat LaunchPad.

Installing LaunchPad

1 Inmarsat LaunchPad Installer for MAC OS X
1.1 Installation Process

This section describes installation of the latest version of Inmarsat LaunchPad onto a Macintosh operating system.

Java Runtime Environment (JRE) is required for LaunchPad operation, however this application should already be resident in the Macintosh operating system.
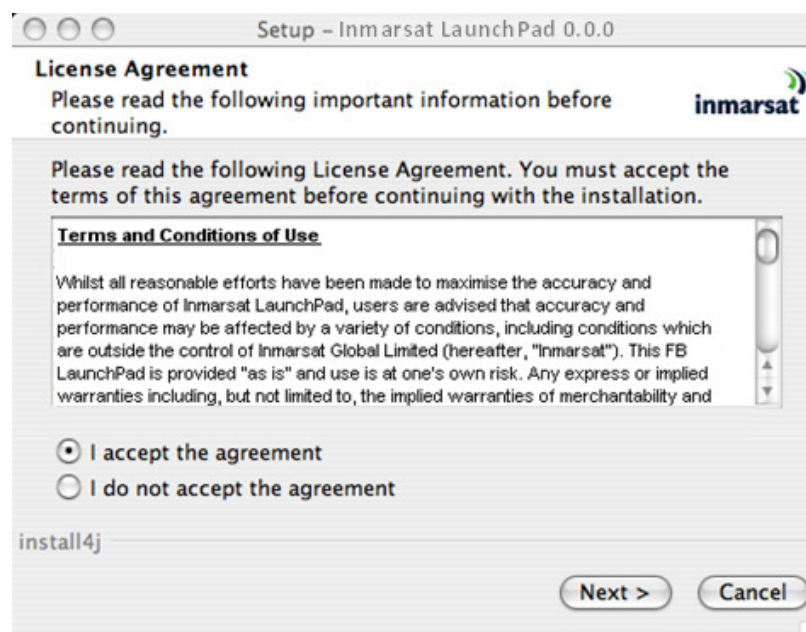

The latest version of Inmarsat LaunchPad can be downloaded from the Inmarsat Web site at **www.inmarsat.com/support**.

1.1.1 User Authentication

The LaunchPad installer requires the user to be a member of the Administrator group.   Log into the MAC as a user with root privileges before you start the installation process.

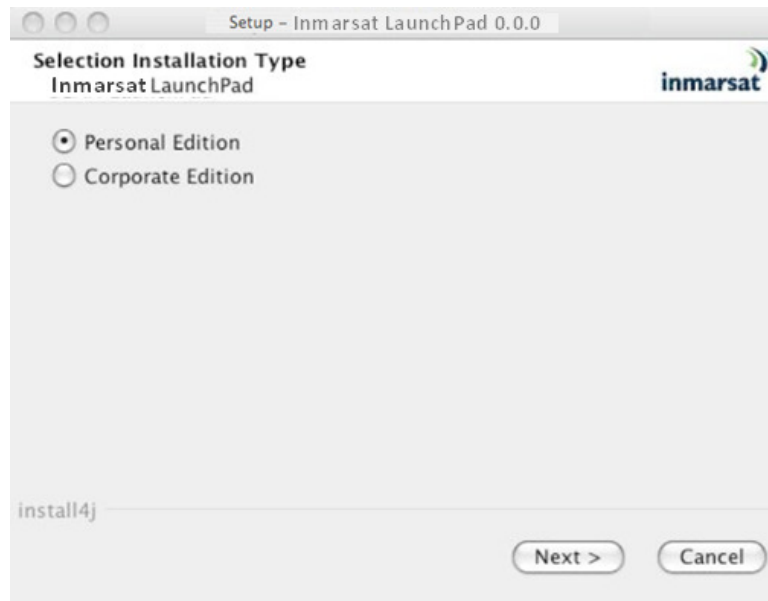

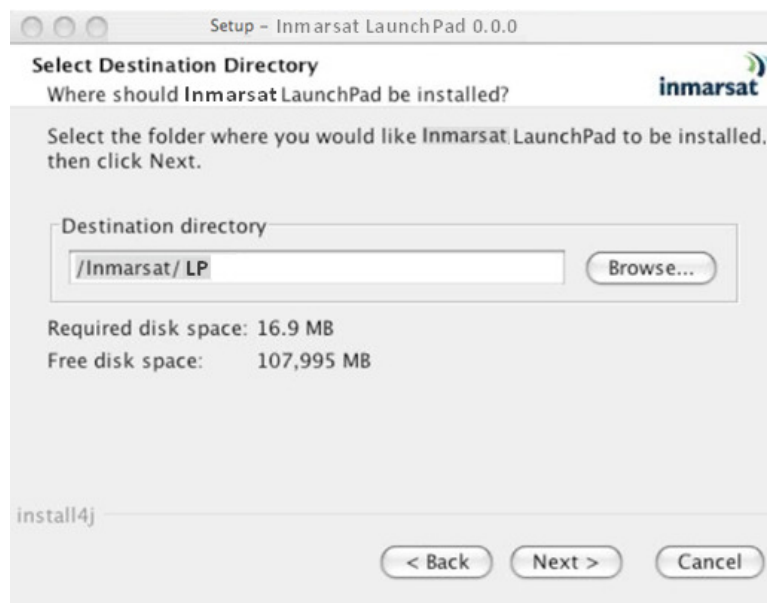

1.1.2 Terms and Conditions

Check **I accept the agreement** then click on **Next.**

1.1.3   Selection of Edition

Check **Personal Edition** and click on **Next** to continue.
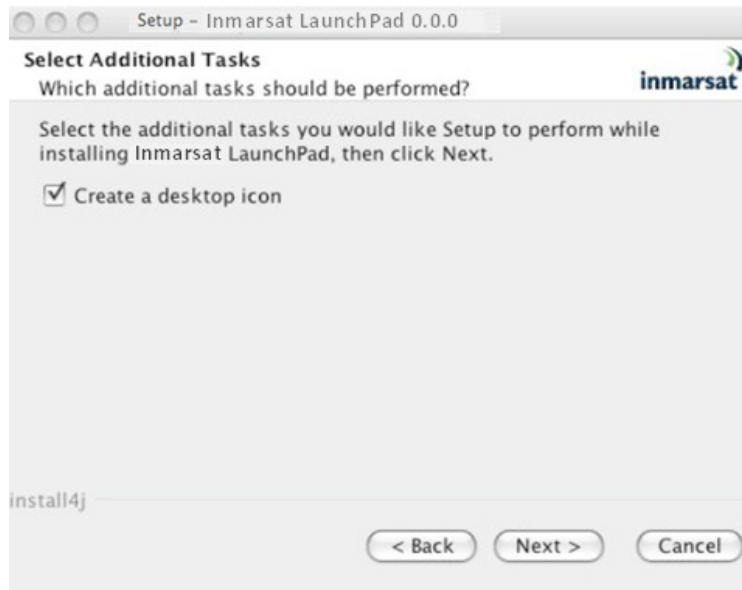

1.1.4   Destination Folder selection

The destination directory is automatically set to **/Inmarsat/LP**.   Click on **Next** to continue.

1.1.5   Shortcut Options

Create a desktop icon.   By default, the option is checked when installing for the first time.

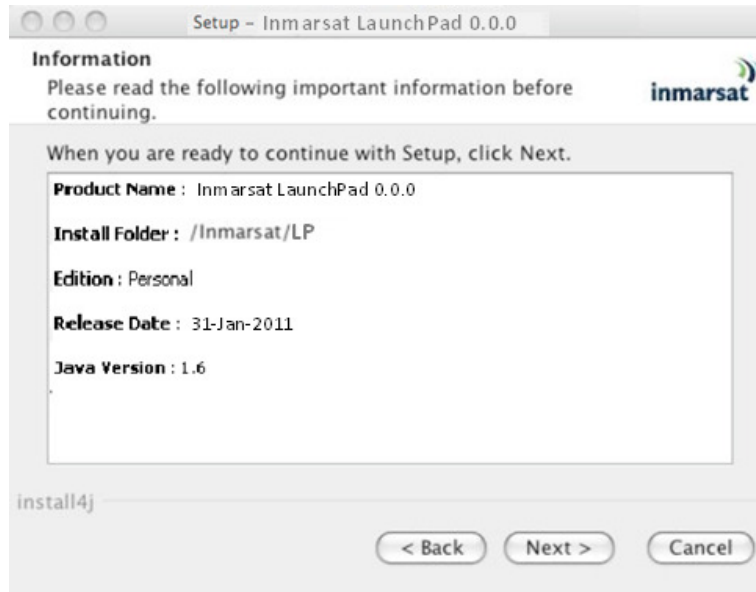

Click on **Next** to continue.

The following icon will be created on your desktop. When you are ready to open LaunchPad, double click on the icon:

Inmarsat

LaunchPad

Datamatics Global Services

1.1.6 Summary

Inmarsat LaunchPad Installer summarises the information provided.   Click on **Next** to continue.

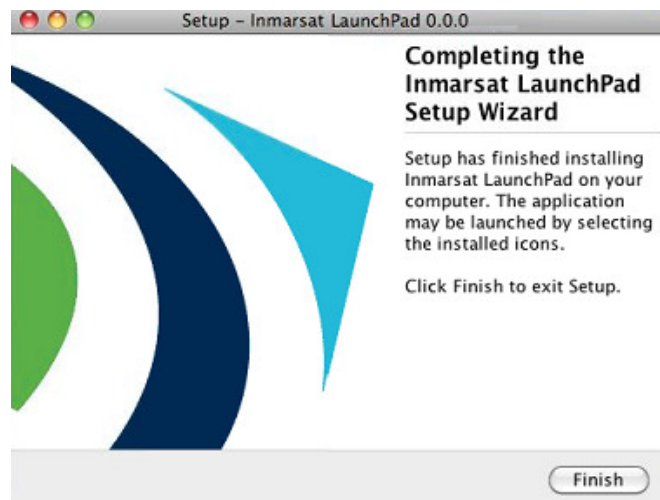

1.1.7 Installing

An interim screen displays the progress of LaunchPad installation.   No action is necessary unless you wish to abort installation, in which case click on **Cancel**.

1.1.8   Installation Complete

LaunchPad installation is complete when the following screen is displayed:

Click on **Finish**.
Datamatics Global Services

1.2   Un-installation Process

LaunchPad can be un-installed from your computer using the following process.

a. LaunchPad installer requires the user to be a member of the Administrator group.

b. Select **Macintosh HD > Inmarsat LaunchPad Uninstaller**.   The following screen is displayed:

c. Click on **Next** to continue.   A screen similar to the following is displayed:

Datamatics Global Services

d. The following screen is displayed on successful un-installation.

Click on **Finish**.

The application is removed from your computer together with the desktop icon and shortcut.

Datamatics Global Services

Special Note (for every release from v5.0.7):

1. *Inmarsat LaunchPad v5.0.7 has undergone some extensive changes for HDR integration owing to which it cannot be installed directly over v5.0.5 with older User Data*

   We advise that, LaunchPad users should first note down the custom Data Icons and their configurations along with User added APN in v5.0.5.

2. *Inmarsat LaunchPad v5.0.9 has undergone changes to User Session data owing to integration of MEAS satellite coverage area.*

   We advise that, LaunchPad users should first note down the APN data, custom IP and Port if any for connecting to User Terminal, Custom GPS location if any, and Auto Connection status set from Launchpad Services menu item.
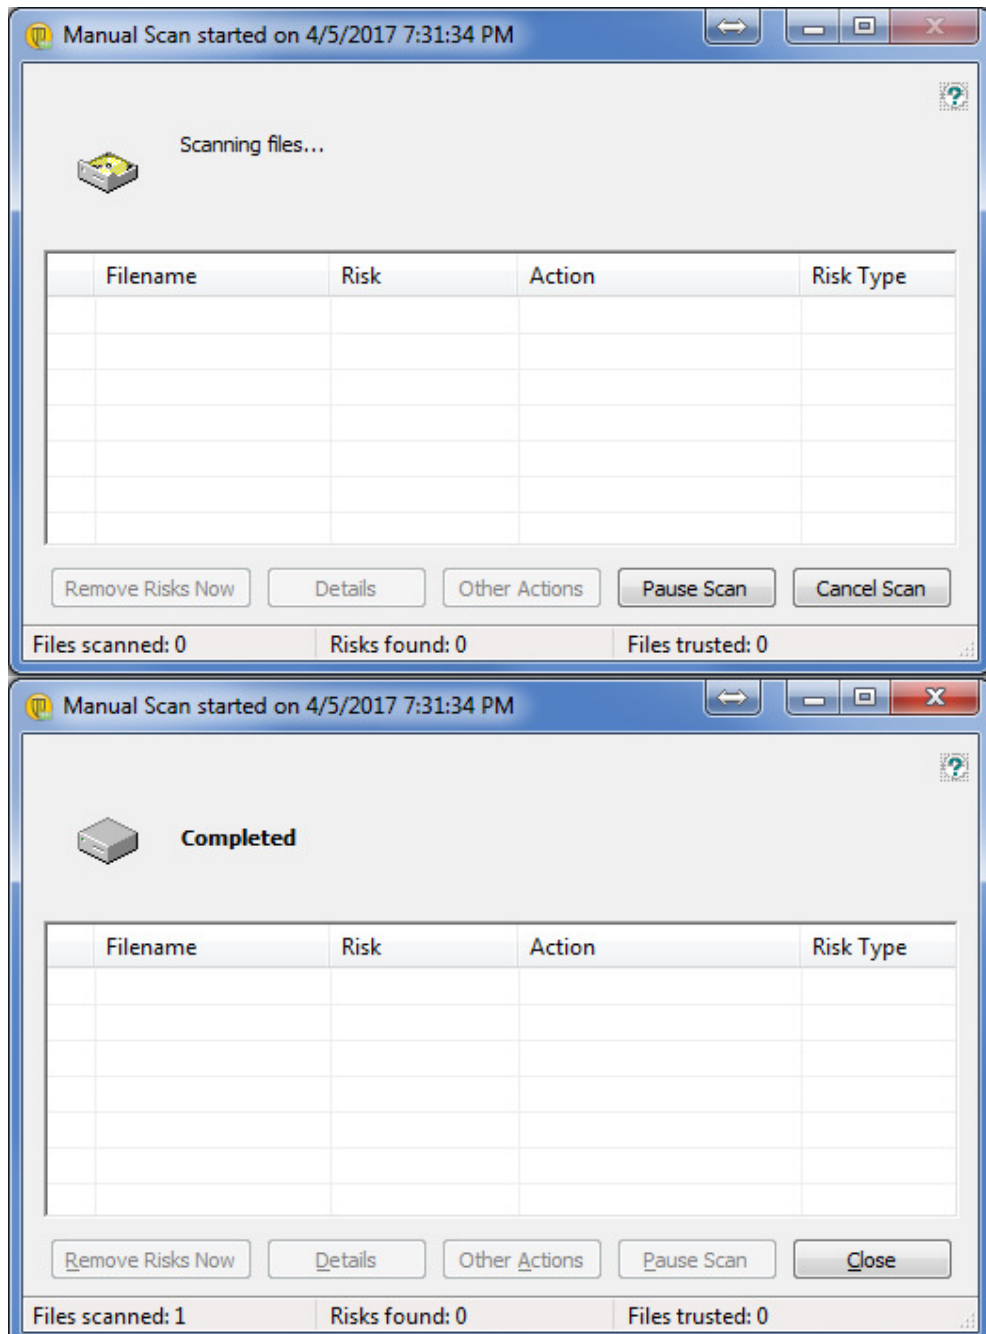

3. *Install v5.0.7 of the Inmarsat LaunchPad.*

4. *Create Data Icons, APN and other User Session Data if applicable based on their earlier v5.0.5 data.*

Problems Resolved/ Work Requests serviced -

Main Features:

- Setting up APN with multiple username and password to data connection
- Data disconnection for APN with Username assigned.
